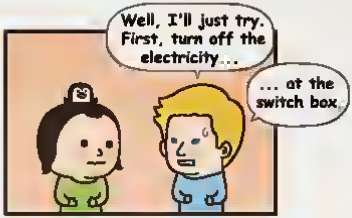
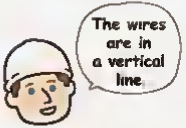
## To put up a shelf : part2

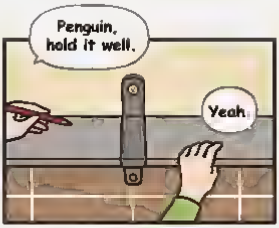
Because of the crazy detector,
Mev couldn't hold the screwdriver steadily.





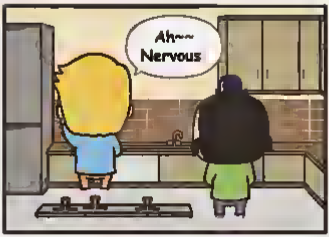
But he trusted what the builder told him before,

he decided to put up the shelf.



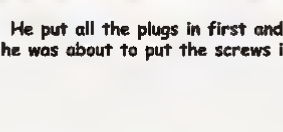
He made marks on the places where the screws would go.

Mev finally put the plugs in.

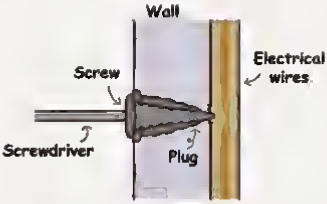


We felt very nervous.

He put all the plugs in first and he was about to put the screws in.



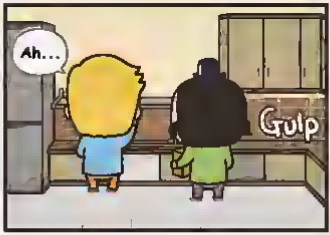
But it seemed like it didn't work very well



This is what penguin was worried about.

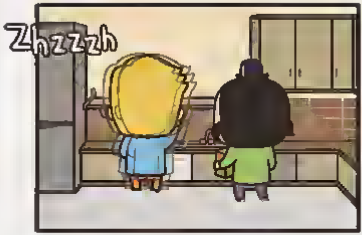
So we decided to have an emergency plan in a half serious and half joke way.

I held a wooden box.



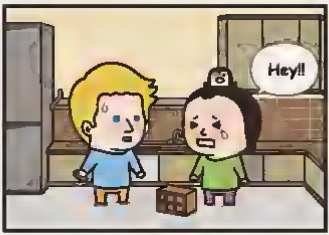
And Mev held the driver and started to tighten the screw.

At that moment.



I was really really surprised.

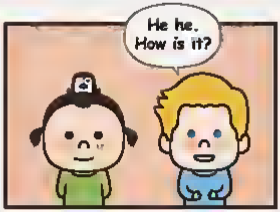
Just for 2 seconds,
it was Mev's joke but...



... it made me cry.

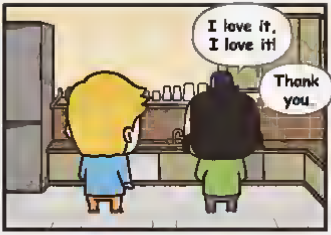
If something happened to Mev
because of the shelf,...

... I wouldn't be able to forgive myself.



Anyway, after it was all completed without any accident,...

A lovely shelf put up on the kitchen wall.

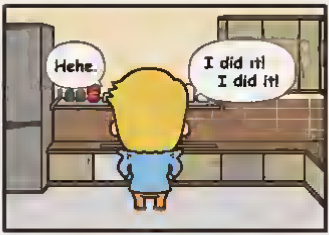


I love it, I love it!
Thank you.

Let's tidy up the other things then.

Hehehe.

**And...**



... Mev was very satisfied and proud of himself.
